**YAP Living History Museum**

Yapese traditional building skills still thrive as shown in the renewal of the Pebay at the Yap Living History Museum. The periodic renewal of these traditional buildings is an opportunity for younger Yapese to learn the skills of the elders, and is one of the main goals of the Museum. Yap Visitors Bureau has received national funding for improvement to the museum which include a stage for community events, a gazebo, public restrooms, and a site improvement, and construction of the neighboring island canoe houses. YVB would like to thank all the communities working to make this a distinctive centrally located and beautiful gathering place for community events.
